

ANMOL MATHUR

Chief Technology Officer · Technology & Engineering Leader

Mumbai, India · +91 98671 91999 · anmolm@gmail.com · anmolmathur.com · linkedin.com/in/anmolmathur

Passionate soccer player — coaching technology teams, organisations and clients to new heights of productivity and success.

PROFESSIONAL SUMMARY

Technology executive with 25 years in engineering and 12+ years in C-level and VP roles, building and leading technology organisations across EdTech, media and OTT, e-commerce, sports and global banking.

Track record of taking platforms from concept to commercialisation, modernising legacy estates onto cloud-native architectures, and embedding AI into how the business actually operates — while cutting run-cost and holding availability above 98%.

CORE COMPETENCIES

Technology Strategy & Roadmap · AI Strategy & GenAI Adoption · Cloud & Platform Modernisation · Engineering Org Design & Hiring · P&L, Cost Control & FinOps · Enterprise & Microservice Architecture · Product Management · Vendor & Partner Management · Data Platforms & Analytics · Agile Delivery at Scale · Cybersecurity & Compliance · Board & Stakeholder Management

PROFESSIONAL EXPERIENCE

Chief Technology Officer

TeamLease EdTech · Mumbai, India

Sep 2025 – Present

India's largest Work-Linked Degree platform — 60+ university partners, 600,000+ students. Reporting to the Founder & CEO with full ownership of technology strategy, architecture and execution across a 15-system estate.

- Own the technology function end to end — engineering, product, infrastructure, data, security and the technology budget — for a business preparing for institutional fundraise and IPO readiness.
- Leading UMS 2.0 platform modernisation: migrating the core University Management System from a legacy .NET monolith to microservices on React and .NET Core using the Strangler Fig pattern, de-risking the platform without a big-bang cutover.
- Delivered a data warehouse and business intelligence layer that closed long-standing data-integrity and reporting gaps affecting 60+ university clients, giving leadership a single reconciled view of admissions, revenue and delivery.
- Launched AI-driven student engagement — voice-AI lead qualification through a strategic partner, an AI call-analysis pipeline, and a proprietary AI Mock Interview platform — positioning the company as an AI-native EdTech player.
- Institutionalised AI-assisted engineering and workflow automation (n8n) across the organisation, lifting delivery velocity and letting non-technical teams automate their own operations.
- Rebuilt technology governance: consolidated telephony and SaaS vendors, introduced maker-checker controls on production configuration, and put a DPDP-readiness programme in place ahead of the 2027 deadline.

Head of Technology & VP Engineering

Hungama Digital Media Entertainment · Mumbai, India

Jun 2023 – Sep 2025

India's leading digital media and OTT group — Hungama Music, Hungama Play, Hungama Gold and Bollywood Hungama — delivering music and video services to consumers, telcos and media partners.

- Led a 66-member technology organisation across engineering, DevOps, QA and operations, owning the architecture and delivery of every consumer-facing and partner-facing service.
- Reduced technology operating expenditure by more than 50%, from INR 3 Cr to INR 1.3 Cr annually, through cloud right-sizing, contract renegotiation and workload consolidation — with no reduction in service quality.
- Re-platformed the technology stack onto Kubernetes and CNCF tooling, replacing a fragmented legacy estate with a standardised, observable, horizontally scalable platform.
- Held SLAs above 98% uptime across all services while the platform was being rebuilt underneath, through improved release governance, monitoring and incident practice.
- Drove the organisational AI strategy — deployed a no-code LLM platform and GPU infrastructure so content, marketing and operations teams could build their own AI workflows.

Head of Technology & VP Engineering

Times Professional Learning (TimesPro) · Mumbai, India

Sep 2021 – Mar 2023

The professional-education arm of The Times of India Group, delivering executive programmes with IIMs, IITs and global institutions.

- Built the technology function from the ground up — hired and led a 40+ person team within one year spanning engineering, product and IT operations.
- Conceptualised and shipped the in-house Learning Management and Sales Management platforms, replacing manual processes across the learner and admissions journey.
- Defined the software architecture and stood up an agile development practice supporting both web and mobile applications.
- Consolidated the fragmented SaaS and vendor estate and set the digital transformation roadmap for the organisation.

Technology Director

Xfinite Technologies (Mzaalo) · Mumbai, India

Jan 2020 – Aug 2021

Venture-backed OTT, user-generated content and blockchain-token startup.

- Held three functions concurrently — Head of Technology, Head of Product and Head of Ad Operations — for the Mzaalo platform in an early-stage environment.
- Built and led a 20+ person team within one year, working directly with the Founder and COO on product and technology architecture and the roadmap.
- Took the product from 0 to 10,000 users and commercialised it.
- Established the digital advertising revenue line from zero, bringing together publishers, marketing partners and the technology integration behind it.

Technology Director & Head of Outsourcing

Digitas India (Publicis Groupe) — Client: Formula 1 · Mumbai & London, UK

Dec 2016 – Jan 2020

Technology lead for the India division of Digitas UK, serving Formula 1 — one of the largest sporting properties in the world.

- Set up and led a 35+ person India delivery centre — architects, developers and project management — including process definition and technology implementation.
- Scaled outsourced delivery across the wider Digitas client portfolio to a peak span of 150+ technologists.
- Owned the Formula 1 UK engagement alongside Digitas UK, providing architecture solutions and delivering them cost-effectively under agile methodologies.
- Built the offshore operating model — governance, quality gates and client management — that made UK-to-India delivery repeatable.

Chief Technology Officer

Ogaan Media (ELLE, ELLE DÉCOR, SquareInch) · Mumbai, India

Jan 2016 – Dec 2016

Publisher of ELLE India and ELLE DÉCOR, and parent of the SquareInch design-commerce startup.

- Owned the strategic design, development and implementation of the ELLE, ELLE DÉCOR, SquareInch and IndiaDesignID web properties.
- Built the online advertising revenue stream and managed the complete IT portfolio.
- Took the SquareInch e-commerce startup from concept through product development to commercialisation, covering marketplace model design, partner onboarding and client management.

Vice President — IT Development

HSBC (The Hongkong and Shanghai Banking Corporation) · Mumbai, India & Hong Kong

Aug 2008 – Jan 2016

Global corporate and retail banking technology, with a four-month posting in Hong Kong.

- Application owner for the receivables and cash management software estate supporting HSBC's corporate banking business, accountable for cost, implementation and support.
- Owned corporate and retail banking applications across the lifecycle — vendor management, product and platform selection, requirements, test management, global rollouts and production support.
- Delivered multi-vendor product rollouts across geographies under banking-grade change and audit controls.

Project Manager & Business Analyst

Oracle Financial Services / Polaris Software · New York, USA · Mumbai & Chennai, India

Dec 2001 – Aug 2008

Core banking product engineering, including a one-year onsite posting in New York.

- Managed the Global Cash Management System (GCMS) with teams of 12–25 across requirements, SDLC, change management, design, development, implementation and support.
- Delivered under CMMI Level 5 and SQA standards, owning compliance and client management for the engagement.
- Worked hands-on as developer, application designer and tester before moving into delivery leadership.

EDUCATION

Certificate in Effective Leadership and Management

Michigan State University

USA · 2020 – 2021

Master of Business Administration (MBA), Marketing

NMIMS, University of Mumbai

Mumbai, India · 2004 – 2008

Bachelor of Engineering (B.E.), Electronics

V.E.S. Institute of Technology, University of Mumbai

Mumbai, India · 1997 – 2001

Higher Secondary Certificate (H.S.C.), Science

Bhavan's College, University of Mumbai

Mumbai, India · 1995 – 1997

TECHNOLOGY & TOOLS

AI & Machine Learning: OpenAI API, Anthropic Claude API, Llama 3.3, Gemini, LangChain, Ollama, Hugging Face, AutoGen Studio, Open WebUI, Qdrant, agentic AI, RAG, GPU infrastructure

Cloud & DevOps: AWS, Google Cloud, Azure, Kubernetes, Docker, Terraform, CNCF tooling, WebSphere, APIGEE, REST APIs, CI/CD

Engineering Stack: Java, Python, PHP, Node.js, React.js, Vue.js, Ruby on Rails, .NET Core, microservices, event-driven architecture

Data & Analytics: Snowflake, BigQuery, SQL and NoSQL databases, data warehousing, Tableau, Power BI, PostHog, big data pipelines

Platforms & SaaS: Salesforce, Moodle, Strapi, Contentful, Brightcove, Vimeo, WordPress, Adobe AEM, n8n, Magento, Spree Commerce

COVER LETTER

Hiring Committee

Dear Hiring Committee,

I am writing to express my interest in a senior technology leadership role within your organisation. Over 25 years I have moved from writing core banking code in Chennai and New York to running technology functions as CTO and VP of Engineering — and the through-line has been the same throughout: take a technology estate that is holding the business back, and turn it into the thing that moves the business forward.

Most recently, as Chief Technology Officer at TeamLease EdTech, I own technology strategy and execution for India's largest Work-Linked Degree platform, serving 60+ university partners and over 600,000 students. I am leading the migration of the core University Management System off a legacy monolith onto microservices using the Strangler Fig pattern, I have delivered the data warehouse and business intelligence layer that finally gave leadership one reconciled view of the business, and I have taken AI from a slide into production — voice-AI lead qualification, AI call analysis, and an AI mock-interview platform now in the hands of students.

Before that, at Hungama Digital Media Entertainment, I led a 66-person technology organisation and reduced annual operating cost by more than half — from INR 3 Cr to INR 1.3 Cr — while re-platforming onto Kubernetes and holding availability above 98%. Cost discipline and engineering ambition are not opposites in my experience; the same architectural clarity buys you both.

What I bring is range with depth. I have built teams from zero to forty in a year, and managed a span of 150+ technologists across India and the UK. I have delivered under CMMI Level 5 and banking audit controls at HSBC and Oracle Financial Services, and I have shipped a startup product from zero to ten thousand users at Mzaalo. I have worked onsite in New York, London and Hong Kong, and I am equally comfortable in a board conversation about capital allocation and in a design review about service boundaries.

I would welcome the opportunity to discuss how that experience maps onto what you are building. Thank you for your time and consideration.

Sincerely,

Anmol Mathur
